**Online access is for libraries and is good for the life of the edition.

“This book offers an unprecedented in-depth analysis of cyberlaw issues arising in e-business, resulting in a unique collection of academic yet practical papers.”

- Takashi Kubota, Waseda University, Japan

As the various types of global e-business grow rapidly, the need to establish adequate cyberlaws is increased. Reformation of domestic and global laws has been underway; however, the nature of e-business is one of constant technological developments, consistently outdating existing laws.

Cyberlaw for Global E-Business: Finance, Payments & Dispute Resolution examines cyberlaw discussions worldwide on topics such as cybercrime and risk management, comparative electronic trading systems of securities, digital currency regulation, jurisdiction, and consumer protection in cross-border markets, and case law on international bank transfers. An invaluable resource for policy-makers, business experts, lawyers, scholars, and researchers, this book provides comprehensive research from a global perspective on the legal, technical, and financial implications of e-business.

Subject:

Business/Management Information Technology and Systems;
Electronic Commerce; Information Security, Privacy, and Ethics

Market:

This essential publication is for all academic and research libraries, especially those affiliated with institutions interested in e-business, information security, or cyberlaw. Bringing together advanced and novel aspects of e-business issues in a comprehensive account, this Premier Reference Source will prove valuable information to a wide audience of e-business, technology users, developers, and providers.

Excellent addition to your library! Recommend to your acquisitions librarian.
